Triage’s Problem

- Inefficient Workflow
- Poor Space Utilization
- Inaccessible Equipment
- Lack of Procedural Integration

Impact of the Problem

- Lengthens Triage Time
- Creates Extra Walking for Nurses and Patients
- Large Space Needed for Current Equipment

Design Principles

- Furniture & equipment should be integrated with the process
- Furniture should be easy to clean
- Furniture should be ergonomic
- Equipment should reduce Triage time
- Furniture should be easily adaptable

Triar’s Impact

- Reduces space of Triage
- Maximizes flow
- Integrates Triage equipment
- Reduces foot print
- Acuity Adaptable

The Future Triar

Universal Treatment Chair

Continuous Patient Monitoring

Interoperability with EMR and Registration

Remote Monitoring of the Patient
